

Project Data Sheet

Project Term Maintenance Dredging Contract

Client Port of Waterford

Description Waterford Port is located in the South East of the Republic of Ireland and has the largest annual dredging requirement of any Irish Port. The dredging locations are divided between berthing positions and open channel dredging. The Bates Partnership (TBP) has managed all stages of the annual dredging process's since 2000. The services rendered include:

- All Licensing/Permitting;
- Budgeting;
- Contracting and Procurement;
- Management of Surveying and Levelling;
- Supervision of Contract/Works;
- Regulatory Assistance; and
- End of contract reporting.

The long-term association between the client and TBP has ensured that annual dredging operations run smoothly and provide the best value for money to achieve the objectives set out by the Port of Waterford.
